

Colorado Electric

Add value to your multifamily property—and save money at the same time.

Our Multifamily Program is designed to help your business be more energy efficient and save money. When you participate in this program, you'll be eligible for increased incentives exclusive to multifamily properties.

Take advantage of these three program benefits:

Schedule a free energy assessment.

A qualified energy advisor will visit your property and conduct a free energy audit, where they will outline all your opportunities for energy savings and incentives. Call us at **888-391-8702** or email blackhillsiq@franklinenergy.com to get started today!

Receive free energy-saving products, installed.

If your multifamily property qualifies, you can receive free energy-saving products, including LEDs, water-saving devices and more! The energy advisor will install these in your property at no cost.

Save on qualifying upgrades with BHE incentives.

Based on your assessment, your energy advisor will provide you with a report outlining recommended energy-efficient upgrades that qualify for incentives. If you choose to proceed, they will connect you with a registered trade ally to get started. Trade allies have been trained and will provide you with a free proposal.

What types of equipment are eligible for incentives?

Your energy advisor can help you determine which projects are eligible. However, qualifying multifamily properties can receive incentives for projects that meet eligibility requirements, including:

- Interior and exterior LED lighting
- Motors and drives
- HVAC energy efficiency

Does my property qualify?

Please contact the BHE Multifamily Weatherization Program at **888-391-8702** or blackhillsiq@franklinenergy.com to verify your eligibility.
